

# DEVELOPMENTAL SCREENING INITIATIVE NM

*“Cultivating Champions for Growing Kids”*

A community interventional model for quality improvement in standardized developmental screening

## PAVING COMMUNITY PATHWAYS

**THE SYSTEM OF CARE**

for young children is a web or network of services that functions best when each agency works in collaboration with all the others.

**EACH AGENCY/ POINT OF CONTACT** in the system of care can and should be a point of access to all other agencies for families.

**CHILDREN AND THEIR FAMILIES** should have easy access to the system of care and should

experience seamless, coordinated services across agencies.

**THE PRIMARY CARE PROVIDER** works in collaboration with parents/caregivers to assure family-centered, comprehensive, coordinated, continuous, compassionate, and culturally effective access to care.
